CocoCrocS®

*Open and serve a coconut in
just five seconds!!*

CocoCrocs... ... Thinking of your business!

We introduce: **CocoCrocs ...**

as strong as a crocodile bite!

The green coconut is one of the best natural foods that nature has provided as well as having a high capacity of electrolytic hydration. However as everyone knows it's inside is protected by a very hard and resistant shell called endocarp, which is very difficult to open. But not any more!

Coco Crocs has been invented with your business and your convenience in mind.

A unique and extraordinary tool designed to open the green coconut in a way that is easier, quicker, safer and more hygienic.

Its modern design is compact, light and resistant, making it easy to use anywhere and by anyone .

Its unique lever system enables you to open the coconut with the minimum of strength and safely.

The different interchangeable TITANIUM heads allow for a clean and homogeneous cut. It is made of highly durable materials, making it suitable for food use.

Its modern design is compact, light and resistant, making it easy to use anywhere and by anyone .

*A traditional product adapted
to our modern era.!*

CocoCrocs 3.0 The Machine!!

A machine made completely of stainless steel with TITANIUM heads. It's the only machine in the world with interchangeable heads allowing you to choose from among different forms: circle, heart, star, diamond, hole for straw, etc. It has been designed for both Right- and Left-handed use. A modern and compact design, completely collapsible, making for easy transportation. It is the lightest and safest machine on the market. (There is no possibility of suffering an accident such as a guillotined or crushed finger, unlike other machines on the market). An extraordinary finish with a modern design.

Characteristics:

- » Unique in the world with *interchangeable TITANIUM heads*
- » Automatic return system on lever
- » Made of high quality stainless steel.
- » Heads suitable for food.
- » The lightest one on the market.
- » Automatic system to expel the shell.

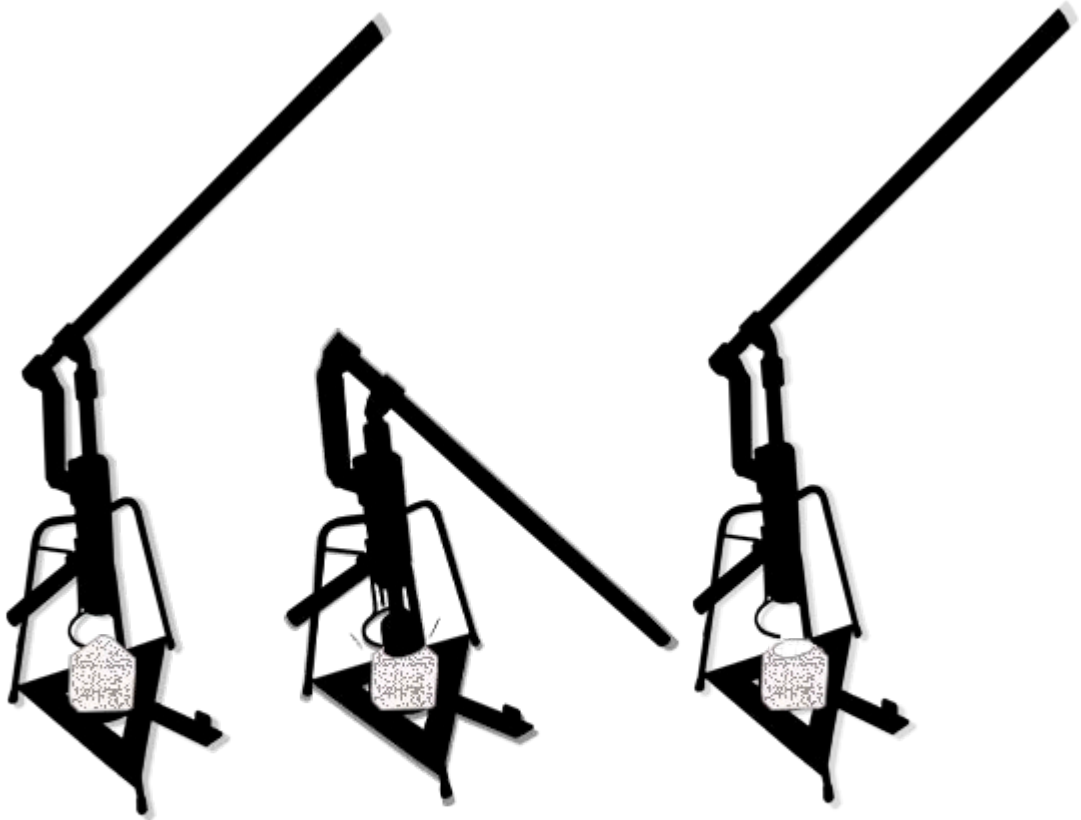

- » Completely collapsible.
- » Ergonomically safe
- » Coconut restraint system.
- » It contains optional accessories.
- » Economic and much more.

When you get your CocoCrocs you will receive a machine designed to work in the quickest and safest way. And furthermore, you will maybe know how to use it from having seen it in Youtube videos, food fairs or because of its ease of use.

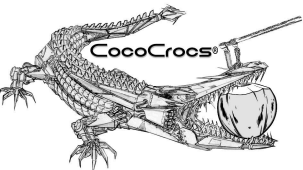

EASY, SAFE AND QUICK
....ONE, TWO... CROCS!

CROCS!

One, two...crocs!!

How to use it

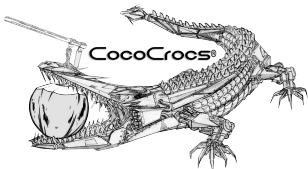

So simple that anybody can use it:

1. Put the coconut inside the dish of the Machine.
2. Press the lever down in order to perforate the coconut with the chosen head.
3. Take out the coconut from the machine.

Note:

- When the coconut is open, the lever will automatically rise and expel the shell.
- If you wish you can adjust the coconut restraint system to stop the fruit from rising up after being perforated.
- There is an optional 4th leg to increase stability.
- The machine can be adjusted for both right- or left-handed users.

Designed to protect your health and safety as well as that of your employees
